

Motorcycle Shock Absorber Oil Seal

This oil seal is designed for motorcycle shock absorbers. It provides a reliable seal to prevent oil leakage and maintain optimal damping.

Product Overview

High-Performance Suspension Sealing

This high-performance oil seal is specifically engineered for motorcycle shock absorbers to ensure superior damping efficiency. Constructed from advanced rubber compounds, it offers exceptional resistance to wear, heat, and chemical degradation for long-lasting reliability. The seal provides a precision-fit solution that effectively prevents oil leakage and contributes to smooth suspension operation across various motorcycle models.

Technical Details

Key Functional Benefits

- Prevents hydraulic oil leakage
- Maintains optimal suspension damping
- Precision-engineered for secure fit
- Extended service life

Application Compatibility

Motorcycle Shock Absorbers

Material Composition

High-quality rubber, Heat-resistant, Wear-resistant, Chemical-resistant
