

# Motorcycle Spark Plug

This spark plug provides reliable ignition for motorcycle engines, ensuring optimal performance. Its durable construction withstands high temperatures, offering longevity and compatibility with various motorcycle models.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Ignition Solutions

These ignition spark plugs are engineered to provide reliable engine performance and efficient combustion for various motorcycle applications. Featuring a durable copper core construction, they are designed to withstand high temperatures and pressures while promoting improved fuel efficiency and reduced emissions. Compatible with a wide range of models, these units offer a cost-effective alternative to major aftermarket brands without compromising on quality.

## Technical Specifications

### Available Models

- E8TC
- E8TC-H
- D8

### Cross-Reference Compatibility

NGK, DENSO, CHAMPION, BOSCH

## Performance Features

### Key Performance Benefits

**10 PCS**

Pack Size

### Key Features

- Catalytic converter compatible
- High thermal conductivity
- Enhanced fuel efficiency
- Reduced exhaust emissions

### Core Material

Copper Core
