

# Motorcycle Spark Plug with Platinum Pad

This spark plug is designed for improved performance and longer life in motorcycle engines. It features a ribless insulator and tapered center wire electrode with a platinum pad for optimum efficiency.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Ignition Solution

This motorcycle spark plug is engineered for improved performance, longer operational life, and optimum engine efficiency. Featuring a tapered center wire electrode with a platinum pad, it ensures reliable ignition under demanding conditions. The design incorporates advanced materials like a 95% pure alumina insulator and a copper core electrode to maximize heat dissipation and prevent engine overheating.

## Technical Specifications

Model	A7TC
Insulator Material	95% Pure Alumina
Electrode Features	Platinum Pad Tip, Tapered Center Wire, Copper Core

## Construction & Durability

### Design Features

- Multi-ribbed insulator eliminates flash over
- Heat crimping process for gas-tight fit
- Conductive glass inner sealing
- Multi-layer gaskets for strong elasticity and sealing

Housing Finish	Nickel Plated
----------------	---------------

## Performance Metrics

### Key Performance Benefits

<b>95 %</b> Alumina Purity	<b>1 Optimized</b> Heat Dissipation
