

Motorcycle Speedometer Gauge with Digital Odometer

This motorcycle speedometer gauge displays speed in both kilometers per hour (km/h) and miles per hour (mph). It features an analog display with a needle indicator and a digital odometer for tracking distance traveled.

Product Overview

Precision Instrumentation for Motorcycles

This motorcycle speedometer gauge offers a reliable dual-display system, combining classic analog needle tracking with a modern digital odometer. Designed for versatile use, it supports both kilometers per hour (km/h) and miles per hour (mph) measurements to accommodate international riding standards. With a clear, high-contrast interface, it provides riders with essential speed and distance data at a glance.

Technical Specifications

Speed Range (Metric)

160 km/h
Max Speed

Speed Range (Imperial)

100 mph
Max Speed

Display Resolution

- Speed: 0.1 resolution
- Distance: 0.1 resolution

Features

Display Types	Analog Needle, Digital Odometer, Dual Unit Support
Compatibility	Motorcycles and similar vehicles
