

Motorcycle Speedometer

This analog speedometer displays speed in kilometers per hour, ranging from 0 to 120 km/h. It includes a five-digit odometer for tracking distance.

Product Overview

Precision Analog Performance

This high-quality analog motorcycle speedometer is engineered for clear, reliable performance on the road. Featuring a classic dial interface calibrated in km/h, it provides instantaneous speed tracking from 0 to 120. With an integrated five-digit odometer, this unit is an essential instrument for monitoring trip distance and vehicle velocity.
