

Motorcycle Starter Gear for CITY125 GS150 GS175 GY6125

This motorcycle start gear is designed for CITY125, GS150, GS175, and GY6125 models. It features a durable metal construction with precision-cut gears and a robust spring mechanism for reliable starting performance.

Product Overview

High-Performance Starter Gear Assembly

This starter gear assembly is precision-engineered for reliable engine ignition across multiple motorcycle models. Constructed from durable metal with a robust spring mechanism, it ensures smooth engagement and disengagement during the starting process. Designed to withstand high-stress environments and elevated temperatures, this component provides long-lasting durability and optimal starting performance.

Compatibility

Compatible Models

CITY125, GS150, GS175, GY6125

Technical Details

Key Features

- Precision-cut gear teeth
- Robust return spring mechanism
- High-temperature resistance
- Engineered for high-stress operation

Included Components

- Central shaft
- Toothed wheel
- Return spring

Construction

Durable metal alloy
