

Motorcycle Suspension Shock Absorber

This motorcycle shock absorber provides superior damping and ride comfort. It features durable steel construction, adjustable preload, and a progressive spring rate for optimal handling.

Overview

High-Performance Suspension Solution

This high-performance motorcycle shock absorber is engineered for superior damping and enhanced ride comfort. Built with durable steel construction, it provides the reliability needed for professional applications. The unit features adjustable preload and a progressive spring rate, ensuring optimal handling and stability across a wide variety of riding conditions.

Technical Specifications

Key Performance Benefits

- Superior damping performance
- Enhanced ride comfort
- Optimal handling stability
- Versatile for various riding conditions

Construction Material	Steel
Adjustability Features	Adjustable Preload, Progressive Spring Rate
