

Motorcycle Swing Arm Bushings

High-quality bushings designed for motorcycle suspension systems. These bushings provide a reliable connection between the swing arm and the frame, ensuring smooth and controlled movement.

Product Overview

High-Performance Swing Arm Bushings

These high-quality swing arm bushings are engineered specifically for motorcycle suspension systems. They provide a durable and reliable connection between the swing arm and the frame, ensuring smooth and controlled movement during operation. Built from robust materials to withstand significant wear and tear, these bushings are an ideal choice for both maintenance replacements and performance upgrades, contributing directly to improved handling and stability.

Technical Specifications

Key Features

- Wear-resistant construction
- Improved handling and stability
- Durable connection interface

Compatible Model	CG125
Application	Motorcycle Suspension, Swing Arm, Frame Connection
