

# Motorcycle Tail Light with License Plate Bracket

This is a motorcycle tail light assembly with an integrated license plate bracket. The assembly is designed for easy installation on motorcycles and provides both tail light and license plate mounting functionality.

## Product Overview

### Integrated Tail Light Assembly

This motorcycle tail light assembly features an integrated design that combines a high-visibility red lens with a robust license plate bracket. Engineered for durability and ease of installation, the black metal bracket includes elongated mounting holes for flexible positioning. It serves as a dual-purpose solution for both essential rear lighting and secure license plate mounting.
