

Motorcycle Tail Light with License Plate Bracket

This motorcycle tail light assembly features a bright red tail light with integrated reflector and a black metal license plate bracket. The tail light is designed for optimal visibility and safety, while the bracket provides a secure mounting point for the license plate.

Overview

Integrated Tail Light and Mounting Solution

This motorcycle tail light assembly is engineered for both safety and functionality, featuring a high-visibility red tail light with an integrated reflector. The unit comes complete with a durable black metal license plate bracket, providing a secure and streamlined mounting point. It is an ideal solution for custom motorcycle builds, café racers, or as a reliable replacement for damaged stock components.
