

Motorcycle Telescopic Front Fork Shock Absorber Set

Motorcycle front fork shock absorbers provide damping and spring action for a smoother ride and improved handling. The telescopic forks consist of inner sliders that move within outer stanchions.

Product Overview

Professional Grade Telescopic Suspension

This telescopic front fork shock absorber set is engineered for optimal motorcycle handling and rider comfort. Featuring a durable two-tube construction, the assembly utilizes a precision-engineered inner slider and outer stanchion system to provide superior damping and spring action. The design is ideal for professional replacement or customization, ensuring a smoother ride and improved steering responsiveness across various road conditions.

Technical Specifications

Component Type	Telescopic Front Fork
Construction	Polished Metal Sliders, Silver Anodized Stanchions, Reinforced Rubber Seals

Performance Features

Key Performance Benefits

- Enhanced damping for shock absorption
- Improved steering stability and control
- High-grade surface finish for corrosion resistance
- Precise sliding action for responsive suspension
