Product Overview

Advanced Digital TFT Motorcycle Dashboard

This high-performance digital instrument cluster offers riders comprehensive real-time data including speed, RPM, engine temperature, and battery voltage. Engineered for durability and clarity, the TFT display provides an intuitive interface for monitoring trip distance, fuel levels, and essential warning indicators. Designed for reliability, this versatile solution is an ideal upgrade for modern motorcycles seeking a professional-grade dashboard experience.

Technical Specifications

Speedometer Range	160 km/h
Key Monitoring Metrics	Speed, RPM, Voltage, Temperature, Fuel Level, Trip Distance, Odometer
Operating Voltage	12 V

Features & Indicators

Warning Indicators

- ABS System
- Engine Malfunction
- Headlights
- Turn Signals
- General Warning
