

Motorcycle Transmission Gear

This motorcycle transmission gear is designed for optimal power transmission and durability. Manufactured from high-strength alloy steel, this gear features precisely cut teeth for smooth engagement and reduced wear.

Product Overview

Precision-Engineered Transmission Gear

This high-performance motorcycle transmission gear is engineered for optimal power transmission and long-term durability. Manufactured from high-strength alloy steel, it features precisely cut teeth designed to ensure smooth engagement and significantly reduced wear during operation. The central hub is specifically configured for secure mounting and efficient torque distribution across various motorcycle models.

Technical Specifications

Material	High-strength alloy steel
Design Features	Precision-engineered, High-strength, Optimized torque distribution, Smooth engagement
Compatibility	Suitable for various motorcycle models and applications
