

Motorcycle Vibration Damper

This motorcycle shock absorber utilizes a coil spring and damper system. It effectively dampens vibrations and absorbs road shocks, enhancing ride comfort and handling.

Product Overview

High-Performance Vibration Damping

This high-performance motorcycle shock absorber is engineered to provide superior ride comfort and handling. Featuring an integrated coil spring and damper system, it effectively mitigates road shock and minimizes vibration for a smoother experience. Built with durable materials, it ensures long-lasting performance and reliability across various motorcycle models.

Technical Specifications

Construction

Durable Materials • High Performance • Reliable

System Type

Coil spring and damper system

Primary Function

Vibration Damping, Road Shock Absorption, Ride Comfort, Handling Improvement

Compatibility

Compatibility

Suitable for various motorcycle models
