

Motorcycle Wheel A006-1, Lightweight Alloy, Multi-Spoke Design

This high-performance motorcycle wheel is designed for optimal strength and weight reduction. Its multi-spoke design enhances rigidity and improves handling.

Product Overview

High-Performance Engineering

The A006-1 motorcycle wheel is meticulously crafted to deliver a balance of strength and weight reduction. Utilizing a sophisticated multi-spoke geometry, this wheel improves handling rigidity and ensures a smoother, more reliable ride for demanding riders. Its durable alloy construction is engineered to withstand various road conditions while maintaining long-term resistance to corrosion.

Physical Specifications

Material	Lightweight Alloy
Design Style	Multi-Spoke

Compatibility & Features

System Compatibility

- Standard motorcycle tires
- Standard braking systems

Key Features	Lightweight, Corrosion Resistant, High-Rigidity, Enhanced Handling
