

Motorcycle Wheel Rim with Brake Ventilation

This motorcycle wheel rim is constructed from aluminum alloy. It features a three-spoke design with ventilation slots for cooling the braking system.

Product Overview

High-Performance Motorcycle Wheel Rim

This premium motorcycle wheel rim is engineered from high-grade aluminum alloy, combining lightweight construction with exceptional durability. It features a distinct three-spoke design integrated with specialized ventilation slots, specifically crafted to enhance airflow and cooling for the braking system. Designed for reliability and smooth operation, this rim includes a central hub precision-engineered to accommodate bearings for optimal rotational performance.

Technical Specifications

Material	Aluminum Alloy
Design Style	Three-spoke
Key Features	Brake Ventilation, High Durability, Performance Oriented
Hub Compatibility	Standard Bearing Integration
