

Motorcycle Windshield Windscreen Deflector

This motorcycle windshield deflector is made from scratch-resistant PC material. It is designed for electric scooters and motorcycles to provide wind protection.

ADDITIONAL IMAGES

Product Overview

The windshield provides a sleek, functional upgrade that enhances aerodynamics and rider comfort.

Enhanced Riding Comfort

This motorcycle windshield deflector is engineered to significantly improve rider comfort by effectively redirecting wind and debris. Constructed from durable, scratch-resistant polycarbonate, it provides long-lasting clarity and protection against the elements. Its versatile design makes it an ideal upgrade for electric scooters and various motorcycle models, ensuring a safer and more enjoyable riding experience.

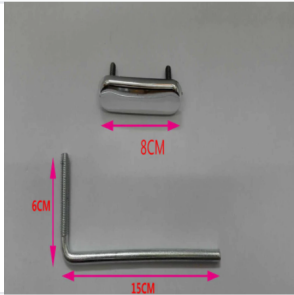

Technical Specifications

High-quality polycarbonate windshield designed for optimal visibility and wind protection.

Material	Polycarbonate (PC)
Thickness	2.2 mm
Finish	Clear / Transparent
