

Motorized Blind Remote Control Kit

This kit allows for remote operation of motorized blinds or shades. It includes a wall-mounted control unit and a compact remote, both featuring directional buttons and indicator lights for easy integration into home automation systems.

Product Overview

Motorized Blind Remote Control Kit

The NYC-86 Motorized Blind Remote Control Kit offers a streamlined solution for managing window coverings. This system includes both a wall-mounted control unit and a compact handheld remote, ensuring flexibility in how you operate your blinds or shades. Designed for seamless integration, it provides intuitive up, stop, and down functionality with a clear indicator light for operational feedback.
