

Motorized Cargo Tricycle with Flatbed

This motorized tricycle features a flatbed cargo area for hauling goods. It is equipped with a single front wheel, motorcycle-style handlebars, and a combustion engine.

Product Overview

Rugged Cargo Transportation Solution

This motorized cargo tricycle is designed for efficient material handling and logistics in urban or rural environments. Featuring a robust flatbed configuration with secure side rails and a rear gate, it offers stable load-carrying capacity for diverse cargo types. Its motorcycle-style front end ensures maneuverability while the reliable combustion engine provides the necessary power for hauling goods over various terrains.
