

Motorized In-Ceiling Projection Screen

This in-ceiling projection screen is designed for seamless integration into home theaters and presentation spaces. It features motorized operation and high-quality screen material for optimal viewing.

Product Overview

Seamless Integration for Professional Spaces

This motorized in-ceiling projection screen is engineered for seamless integration into modern home theaters and corporate presentation environments. Designed to retract completely into the ceiling when not in use, it maintains a clean, uncluttered aesthetic while offering high-performance projection capabilities. The system features smooth, quiet motorized operation and adjustable drop settings to accommodate various ceiling heights, making it an ideal solution for dedicated theaters, conference rooms, and multi-purpose spaces.

Technical Specifications

Operation	Motorized
Installation	In-Ceiling
