Product Overview

Versatile Abrasive Solution

This professional-grade 5-piece mounted abrasive stone set is engineered for high-performance metal grinding, mending, and surface finishing. Designed for compatibility with electric grinders and drills, the set features a 6mm shank diameter for secure attachment. With a variety of stone compositions available, including Brown, White, and Chrome Aluminum Oxide, this set provides tailored solutions for tasks ranging from carbon steel grinding to precision work on blades and measuring tools.

Technical Specifications

Shank Diameter	6 mm
Pieces per Set	5
Compatible Tools	Electric Grinder, Cordless Drill, Electric Drill

Material Performance

Material Performance Matrix

Material Type	Color	Best Application
Brown Aluminum Oxide (A)	Dark Grey	Carbon steel, alloy steel, droped steel, hard bronze
White Aluminum Oxide (WA)	White	Harden steel, alloy steel, high-speed steel, high carbon steel
Chrome Aluminum Oxide (PA)	Red	Blades, measure tools, screws

Material Characteristics

- Brown Aluminum Oxide: High toughness, large application range, cost-effective
- White Aluminum Oxide: Harder than Brown, good grinding performance
- Chrome Aluminum Oxide: Sharper, smooth grinding angle, high resistance
