

Mounted Access Control Intercom System

This mounted system provides secure entry and communication. It features a keypad for code entry, a display screen, and an optional camera for visual identification.

Overview

Professional Access Control Solution

This mounted access control intercom system provides a secure and efficient entry management solution for commercial and industrial facilities. Designed for durability and ease of use, the unit integrates keypad authentication, visual identification, and communication capabilities into a single, robust housing. Its mounted design ensures clear visibility and accessibility, making it an ideal choice for controlled entry points.
