

Mounted Antenna Sensor

Mounted antenna sensors are used in a variety of sensing applications. It can be mounted on poles or other structures.

Product Overview

JBA-311 Mounted Antenna Sensor

The JBA-311 is a specialized sensor designed for pole-mounted applications. Engineered for reliability and ease of installation, this unit is suitable for various signal reception and monitoring environments. Its robust design ensures consistent performance in professional settings.

Technical Specifications

Model Number	JBA-311
