Product Overview

Professional Mounted Disc Plough

This mounted disc plough is engineered for high-performance land cultivation when paired with four-wheel tractors. It excels in challenging soil conditions containing weeds, stems, and frictional debris, ensuring clean furrowing without blockages. Its robust design facilitates easier cutting of roots and stems, resulting in significantly reduced working resistance compared to conventional implements.

Key Features

Performance Advantages

- Non-winding and non-blocking operation
- No soil heap building-up
- Excellent cutting ability for stems and roots
- Reduced soil resistance for fuel efficiency
- Round frame structural design

Compatibility

Tractor Requirements

4-wheel tractor compatible, Mounted system
