

# Mounted Disc Plough with Round Pipe Frame

This mounted disc plough is designed to cut off stems and roots efficiently. Its frame is constructed from round pipe for durability.

## ADDITIONAL IMAGES

## Product Overview

### Professional Mounted Disc Plough

This mounted disc plough features a robust round pipe frame engineered for high-performance soil cultivation. It is designed to work efficiently with four-wheel tractors, effectively cutting through weeds and tough roots without clogging. With its specialized design, it offers reduced working resistance, making it an ideal solution for preparing challenging, frictional soil conditions for planting.

## Key Features

### Operational Advantages

- Non-winding grass mechanism
- Anti-blockage construction
- Smooth operation without soil heap build-up
- Effective stem and root cutting capabilities
- Low working resistance for fuel efficiency

## Technical Specifications

Tractor Compatibility	Four-wheel tractor
Frame Construction	Round pipe frame
Suitable Soil Conditions	Frictional soil, Weedy terrain, Stalk-heavy fields, Soils with debris
