

Mounted Flap Wheel

The interleaf flap wheels with a mounted shaft are designed for sanding, blending, and finishing. They provide consistent material removal and a smooth finish.

Product Overview

Versatile Finishing Tool

These interleaf flap wheels with a mounted shaft are precision-engineered for sanding, blending, and finishing tasks. Designed for consistent material removal, they provide a smooth, uniform finish across a variety of surfaces. The integrated mounted shaft ensures quick and secure attachment to standard power tools like drills, making them highly efficient for diverse applications.
