

Mounting Block with Centered Hole

This mounting block features a square plate on top with a centered circular hole. The component, finished in yellow/gold, can be used as a fixture in various machinery applications.

Product Overview

Professional Mounting Block

This precision-engineered mounting block provides a stable foundation for industrial and electronic assemblies. Featuring a clean, centered circular aperture, it is designed to facilitate secure and reliable fixture alignment. Its robust construction ensures long-term durability in professional operating environments.

Technical Specifications

Design Type	Rectangular base with square top plate
Mounting Configuration	Centered circular hole
Surface Finish	Yellow/Gold
Primary Category	Mechanical Fixture, Industrial Component, Mounting Hardware
