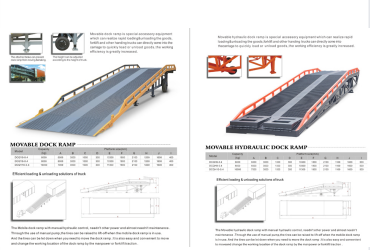
Movable Hydraulic Dock Ramp for Loading and Unloading

This movable dock ramp is special accessory equipment designed to facilitate rapid loading and unloading of goods. It enables forklifts and other handling trucks to directly access the carriage for efficient loading and unloading, significantly increasing working efficiency.



Product Overview

Movable Hydraulic Dock Ramp

This movable hydraulic dock ramp is designed to facilitate rapid loading and unloading of goods between trucks and warehouse docks. It allows forklifts and handling trucks to drive directly into carriages, significantly increasing operational efficiency. With its manual hydraulic control system, the unit operates without external power sources and requires minimal maintenance.

Technical Specifications

Key Capacity Metrics

6000 kg	10000 kg
Base Load Capacity	Maximum Load Capacity

Operational Features

- Manual hydraulic control system
- No external power required
- Low maintenance design
- Manpower or forklift traction mobility
- Adjustable tire height for stationary or mobile use

Available Models

Model	Capacity (kg)
DCQY6-0.4	6000
DCQY8-0.4	8000
DCQY10-0.4	10000
DCQH6-0.4	6000
DCQHB-0.4	8000

Industry Compliance

Ideal Applications	Logistics, Warehouse Operations, Heavy Construction, Transport

Rooms 05–15, 13A/F South Tower, World Finance Centre, Harbour City, 17 Canton Rd, Tsim Sha Tsui, Kowloon, Hong Kong
