Product Overview

Versatile Mixing Solution

This movable multifunctional mixer is engineered for efficient and reliable performance across construction and agricultural environments. Featuring a robust steel construction, a powerful electric motor, and a highly maneuverable frame, it ensures consistent material blending. Its compact design includes a tilting drum for easy pouring and safety mechanisms, making it an essential tool for demanding worksites.

Technical Specifications

Performance Highlights

100 Low Energy
Efficiency

15 Short
Mixing Time

Construction Features

- Reinforced mixing drum with ribs
- Heavy-duty steel construction
- Rear support frame for stability
- Integrated maneuverability wheels
- Tilting drum mechanism

Motor Type

Pure Copper Electric Motor

Compliance & Quality

Quality Standards

Wear-resistant • Durable • Rigorous Quality Control

Certifications

CE, GS
