

MPO Fiber Optic Patch Panel

This high-density MPO patch panel is made from durable, cold-rolled steel. Its modular, rail-type drawing structure allows for easy installation and maintenance.

Product Overview

High-Density MPO Fiber Optic Patch Panel

This high-density MPO patch panel is engineered for efficient fiber optic cable management in data centers and telecommunication networks. It features a sliding tray design that ensures easy access and maintenance, supporting multiple MPO/MTP connectors for rapid deployment and scalability. Constructed from durable cold-rolled steel, this panel provides reliable performance and long-term signal integrity for high-bandwidth applications.

Physical Dimensions

Rack Height Options	1U, 2U
Dimensions (H x W x D)	482 x 385 mm
Installation Standard	19 inch

Material and Finish

Material	Cold rolled steel plate
Surface Finish	Black

Environmental Specifications

Operating Temperature

-10 °C Min Operating Temp	60 °C Max Operating Temp
-------------------------------------	------------------------------------

Storage Temperature

-40 °C Min Storage Temp	68 °C Max Storage Temp
-----------------------------------	----------------------------------

Relative Humidity	10% ~ 90%
-------------------	-----------

Compliance

Reference Standards

ISO/IEC 11801
