

# MPPT Solar Power Inverter for Lithium Batteries

This solar power inverter utilizes MPPT technology for efficient solar energy conversion. It is designed for optimized charging of lithium batteries, featuring pure sine wave output and advanced monitoring.

## Product Overview

### High-Performance Solar Power Inverter

This MPPT solar power inverter is engineered for the efficient conversion of solar energy, specifically optimized for charging lithium batteries. It provides a reliable and sustainable power solution by combining photovoltaic (PV) input with advanced battery management. Designed for professional applications, the unit features pure sine wave output and robust safety mechanisms to ensure stable operation.

## Technical Specifications

Output Waveform	Pure Sine Wave
Technology	MPPT (Maximum Power Point Tracking)

## Compatibility & Features

### Certifications

CE

### Key Features

- Combined PV & Lithium Battery support
- Advanced monitoring and control functions
- Robust safety mechanisms
- Intuitive interface (ON/OFF, Navigation controls)

Battery Compatibility	Lithium Battery
