

MR11 12V Halogen Lamp

The MR11 12V lamp has a 35mm diameter reflector and provides a compact, efficient lighting solution. Operating on a 12-volt power supply makes it suitable for low-voltage applications and compatible with various fixtures.

Overview

Compact Lighting Solution

The MR11 12V halogen lamp is a compact and efficient lighting solution designed for low-voltage applications. With its 35mm diameter reflector, it provides focused and directional light output ideal for precise illumination needs. This lamp is highly versatile, serving as a reliable choice for accent, display, and task lighting in various professional settings.
