

MR11 6V Reflector Lamp

This MR11 6V lamp is a compact reflector lamp with a 35mm diameter. It operates at 6 volts and is designed for various lighting applications.

Product Overview

Compact Lighting Solution

The MR11 6V Reflector Lamp is a precision-engineered lighting component designed for compact applications. With a 35mm diameter, it offers a focused light output suitable for specialized electronic devices and monitors. Its robust reflector design ensures efficient light projection for professional-grade performance.

Technical Specifications

Lamp Type	MR11 Reflector
Operating Voltage	6 V
Diameter	35 mm

Applications

Primary Applications	Monitors, Electronic Devices, Specialized Lighting
----------------------	--

Features

Key Benefits

- Compact 35mm form factor
- Efficient reflector design
- Optimized for 6V systems
