Product Overview

High-Performance Mud Pump Liners

These mud pump liners are engineered for reciprocating pumps to withstand the abrasive and corrosive conditions of drilling operations. Available in both Bi-metal and Ceramic Zirconia configurations, they feature high-strength alloy steel outer hulls for maximum durability. Designed to meet or exceed API-7K standards, these components offer full interchangeability with OEM equipment.

Technical Specifications

Compliance Standard

API-7K

Key Construction Features

- High-strength alloy steel outer hull
- High Chrome alloy inner sleeve (Bi-metal)
- Ceramic inner sleeve (Zirconia)
- Mirror finish honing
- Slippage prevention design

Liner Material Options

Bi-metal, Ceramic Zirconia

Compatibility & Accessories

Available Accessories

- Genuine rubber liner seals
- Urethane liner seals

Compatibility

Fully exchangeable with OEM products for seamless integration into existing pump systems.
