

Mud Pump Piston API-7K

This mud pump piston is made of premium materials and is exchangeable with OEM products. It meets or exceeds API-7K standards.

Product Overview

High-Performance Mud Pump Pistons

These API-7K compliant mud pump pistons are engineered for demanding drilling environments, offering exceptional durability and resistance to wear and corrosion. Designed for optimal sealing and efficient fluid transfer, they are built to withstand high pressures and abrasive drilling fluids. Their robust construction ensures extended service life and reliable performance in extreme conditions.

Technical Standards

Standards Compliance	API-7K
----------------------	--------

Product Features

Key Benefits

- Exchangeable with OEM products
- Extended service life
- Excellent performance in extreme environments
- Operational cost savings
- High-pressure resistance

Available Types

Urethane Bonded Pistons • Replaceable Rubber Pistons

Technical Specifications

Model Identifier	7K-0448
