Product Overview

High-Performance Mud Pump Pistons

These mud pump piston assemblies are engineered for durability and reliability in extreme drilling environments. Designed to meet or exceed API-7K standards, the product line includes both urethane bonded and replaceable rubber options. These components are fully exchangeable with OEM equipment, ensuring seamless integration and reduced operational costs.

Technical Standards

Standards Compliance

API-7K

Product Features

Available Types

- Urethane Bonded Pistons
- Replaceable Rubber Pistons

Urethane Piston Features

Premium Urethane Bonded • Regular Type Available • High Temperature Type Available

Compatibility

Compatibility

Fully exchangeable with OEM products

Operational Benefits

Key Benefits

- Extended service life
- Excellent performance in extreme environments
- Operation cost savings with replaceable rubber kits
