Overview

High-Efficiency Panel Processing

The Multi-Blade Wood Panel Saw is a robust industrial solution engineered for high-volume wood panel production. Featuring multiple saw blades for simultaneous cutting, this machine significantly enhances productivity while maintaining precise cutting parameters. It is equipped with an integrated conveyor system and adjustable platforms to ensure smooth material handling and ergonomic operation in demanding manufacturing environments.

Technical Specifications

Maximum Panel Width	1220 mm
Panel Thickness Range	5-30mm
Cutting Method	Multi-blade, Simultaneous cutting

Features

Key Features

- Integrated control panel for precise adjustments
- Conveyor system with rollers for smooth material handling
- Dust collection system for a clean working environment
- Adjustable height platforms with safety striping

Best For

High-volume production • Wood panel processing
