

Multi-Burner Gas Cooktop

This gas cooktop is made with glass, stainless steel, plastic, and brass. It is designed for heating food.

Overview

High-Efficiency Gas Cooktops

These professional-grade gas cooktops are designed for modern kitchen environments, offering a blend of durability and high-performance heating. Built with premium materials including tempered glass and stainless steel, these units feature advanced safety mechanisms like Flame Failure Devices (FFD) and reliable automatic battery ignition. With multiple burner configurations ranging from high-power triple ring burners to versatile multi-zone setups, these cooktops provide precise control for various culinary needs.

Technical Specifications

Construction Materials	Tempered Glass, Stainless Steel, Brass, Cast Iron, Enamel
Ignition System	Automatic Battery Ignition

Model Comparison

Comparison of Available Models

Model	Burner Config	Dimensions (mm)	Safety
G72AX-DCA	2 x 3.1kW (Triple Ring)	858 x 358	FFD Included
