

# Multi-Cartridge Filter Housing

These multi-cartridge filter housings are constructed from stainless steel. They accommodate multiple filter cartridges to provide enhanced flow rates and contaminant holding capacity.

## Overview

### High-Efficiency Filtration Solution

The Multi-Cartridge Filter Housing is designed for demanding high-purity filtration applications across industrial sectors. Engineered from durable stainless steel, these housings accommodate multiple filter cartridges to significantly increase flow rates and contaminant holding capacity. This robust design is ideal for water treatment, chemical processing, and pharmaceutical manufacturing facilities.

## Technical Specifications

### Availability

- Various sizes
- Various configurations

<b>Material</b>	Stainless Steel
<b>Suitable Industries</b>	Water Treatment, Chemical Processing, Pharmaceutical Manufacturing

## Performance Highlights

### Performance Advantages

**1 Grade**

High Purity

**2 Capacity**

Enhanced Flow Rate
