

Multi-Channel Digital Video Recorder

Professional-grade digital video recorder suitable for surveillance and security applications. It features real-time playback, network connectivity, and advanced video compression.

Overview

Professional Surveillance Solution

This multi-channel digital video recorder is engineered for reliable, continuous operation in demanding security environments. It offers advanced video compression to maximize storage efficiency while supporting high-quality recording resolutions and flexible frame rates. Designed with a user-friendly interface, the system allows for seamless remote access via network connectivity and real-time playback capabilities.

Technical Specifications

Operational Highlights

- Continuous operation support
- Customizable resolution settings
- Variable frame rate support
- Remote management interface

Primary Applications

Surveillance • Security • Remote Monitoring

Recording Features

Multi-channel, Real-time playback, Network connectivity, Advanced compression
