Overview

Versatile Multi-Chemistry Charging Solution

This compact, intelligent battery charger is designed for a wide range of rechargeable battery chemistries, including Li-ion, Li-Fe, and Ni-MH. Featuring multiple independent charging slots, it offers flexible charging currents and precise progress monitoring via clear LED indicators. Its portable design, powered by a Micro USB input, makes it an ideal travel companion for professional users needing reliable power management on the go.

Technical Specifications

Selectable Charging Currents

- 500
- 700
- 1000
- 2000

Supported Battery Types

Li-ion 3.70V, Li-ion 3.85V, Li-Fe 3.20V, Ni-MH 1.20V

Independent Charging Channels

4

Features

Key Features

Micro USB Input • Independent Channels • LED Progress Indicators • Multiple Security Protections • USB Output
