

Multi-Color LED Emergency Vehicle Light Bar

This high-intensity LED light bar is designed for emergency and security applications. It features a multi-color configuration, providing versatile signaling capabilities.

Product Overview

High-Intensity Emergency Signaling

The LTF8500C is a high-intensity LED light bar engineered specifically for emergency and security applications. Featuring a versatile multi-color configuration, it provides critical signaling capabilities with red, blue, and white sections. Its robust design, utilizing a durable polycarbonate lens and aluminum housing, ensures reliable performance in demanding field conditions.

Technical Specifications

Build Materials

- Polycarbonate Lens
- Aluminum Housing

Efficiency

Low Power Consumption • High Light Output

Available Colors

Red, Blue, White

Flash Patterns

Multiple selectable patterns via integrated control module

Installation & Usage

Mounting Options

Vehicle roof and surface mount compatible

Primary Applications

Emergency Vehicles, Security Installations
