

Multi-Conductor Alarm Cable for Security Systems

These multi-conductor alarm cables are designed for security and fire alarm systems. They are available in various gauges and conductor counts, featuring a durable outer jacket for protection against environmental factors, suitable for indoor and outdoor installations, and ensuring reliable signal transmission for critical safety applications.

Product Overview

Reliable Connectivity for Security Systems

This multi-conductor alarm cable is engineered specifically for critical security and fire alarm applications. Featuring a robust outer jacket, the cable provides reliable signal transmission and protection against environmental factors. It is versatile enough to support both indoor and outdoor installation requirements.

Technical Specifications

Primary Applications

- Security Systems
- Fire Alarm Systems

Durability Features

Durable Outer Jacket • Environmental Protection

Cable Type	Multi-conductor alarm cable
Installation Environment	Indoor, Outdoor
