

Multi-Conductor Communication Cable

This communication cable consists of multiple insulated conductors bundled within a protective jacket. It is designed for reliable data transmission and signal integrity in various communication applications.

Product Overview

High-Performance Communication Cable

This multi-conductor communication cable is engineered for reliable data transmission and signal integrity across diverse applications. Featuring high-conductivity copper conductors and a durable protective outer jacket, it ensures stable performance in both indoor and outdoor environments. The integrated color-coded insulation system simplifies the installation process, significantly reducing wiring errors for professional installers.

Technical Construction

Conductor Material

Copper

Insulation Features

Color-Coded, Multi-Conductor, Protective Jacket

Application & Environment

Installation Suitability

- Indoor communication networks
- Outdoor signal transmission
- Data integrity sensitive applications

Key Advantages

Core Benefits

1 High

Signal Integrity

100 %

Copper Purity

Installation Details

Wiring Efficiency

Color-coded conductors facilitate easy identification and error-free installation.
