Product Overview

High-Performance Fire Alarm Cabling

This multi-conductor fire alarm cable is engineered for critical safety and signal transmission in both residential and commercial fire alarm systems. Featuring a durable red FR-PVC jacket and advanced shielding, it provides robust protection against electromagnetic interference. The cable utilizes high-quality bare copper conductors and is fully compliant with rigorous UL safety standards to ensure reliable performance in emergency environments.

Construction

Conductor Material	Bare Copper
Conductor Type	Solid or Stranded
Insulation Material	FR-PVC
Jacket Material	FR-PVC

Compliance & Standards

UL Standards	UL1424, UL1666, UL1685, UL2556
--------------	--------------------------------

Technical Features

Jacket Color	Red
Shielding	Yes
