

Multi-Conductor Internal Wiring Cable

This multi-conductor cable is designed for internal wiring in electronic equipment. Its insulated conductors feature distinct colors for easy identification and connection.

Product Overview

Versatile Internal Wiring Solution

This multi-conductor cable is engineered for reliable internal wiring within electronic equipment and custom cable assemblies. It features multiple insulated conductors, each color-coded for efficient identification and simplified connection processes. The design ensures durability and ease of termination, making it an ideal choice for professional electronic manufacturing and prototyping needs.

Technical Specifications

Termination Status

Pre-stripped • Ready for connection

Conductor Configuration

Multi-conductor

Primary Applications

Electronic Equipment, Custom Cable Assemblies, Internal Wiring

Identification

Color-coded internal wires
