

Multi-Connector Audio/Video Cable

This is a multi-connector communication cable with RCA connectors on both ends. BNC connectors are also included, making it suitable for audio and video signal transmission in CCTV or other electronic applications.

Product Overview

Professional AV Connectivity

This multi-connector communication cable is designed for high-quality audio and video signal transmission in professional environments. Featuring a durable coiled grey design, it includes standardized RCA and BNC connectors to ensure compatibility with a wide range of electronic equipment. It is an ideal solution for CCTV installations and other demanding electronic applications requiring reliable signal integrity.

Technical Specifications
