

Multi-Connector Communication Cable

This communication cable is equipped with multiple connector types such as RCA, DC power, and BNC. It facilitates audio, video, and power transmission in various electronic configurations.

Overview

Versatile Multi-Connector Solution

This multi-connector communication cable is designed for comprehensive connectivity in professional electronic setups. It integrates RCA, DC power, and BNC terminations into a single assembly, streamlining audio, video, and power transmission. The durable black cabling is ideal for complex installations where space-saving and reliable signal integrity are paramount.

Connectivity

Integrated Connectors	RCA, DC Power, BNC
-----------------------	--------------------

Technical Specifications

Supported Transmissions

- Audio signal transmission
- Video signal transmission
- DC power delivery

Design & Construction

Color	Black
Configuration	Coiled end with multiple terminations

Application

Ideal Applications

CCTV Systems • Audio/Visual Setups • Electronic Power Distribution
