

Multi-Core Internal Computer Cable

This multi-core cable is designed for internal wiring applications within computers. It features three internal wires, each with different colored insulation, enclosed in a white outer sheath.

Product Overview

High-Performance Internal Connectivity

This multi-core computer cable is engineered for reliable internal wiring and connectivity within electronic devices and computer peripherals. Featuring three distinct internal wires, it ensures organized and efficient power or signal distribution. The durable white outer sheath provides essential protection for internal components, making it an ideal choice for professional electronic assembly and repair applications.

Technical Specifications

Wire Configuration

- Blue
- Green/Yellow
- Brown

Cable Type

Multi-Core • Internal Wiring

Number of Cores

3

Insulation

Color-coded PVC

Application

Primary Applications

Computer Peripherals, Electronic Devices, Internal Connectivity
