

Multi-Crop Straw Crushing Thresher

This multi-crop thresher efficiently separates grains from stalks. The machine simultaneously chops the remaining straw into smaller pieces for easier handling or field application.

Overview

Versatile Multi-Crop Processing

This multifunctional thresher is engineered for efficient grain processing, supporting a wide range of crops including wheat, rice, sorghum, soybean, and sesame. It features an advanced design with double rollers for threshing, integrated straw cutting, and a multi-stage separation system using vibrating screens and suction air. Built for mobility and ease of use, this machine is an ideal solution for small to medium-sized agricultural operations requiring reliable post-harvest performance.

Performance & Capacity

Feeding Capacity	2000 kg/h
Fan Speed	2450 r/min
Required Power	> 4 KW

Physical Specifications

Mobility

Wheels • Pushing Handles

Total Weight	96 kg
Customization	Color customization available

Crop Compatibility

Supported Crops	Rape, Wheat, Rice, Sorghum, Soybean, Sesame
-----------------	---

Technical Features

System Components

- Double rollers for threshing
- Integrated straw cutting device
- Double screen separation
- Vibrating screen for grass removal
- Specific gravity suction air selection
